# 1. Delivery App Features

## 1.1 Register & Login

- via Email & Password
- via OTP

**1.2 Dashboard:** The dashboard provides important insights related to earnings and orders in the queue.

## 1.3 Status & Range Configuration

- The delivery staff can mark their status as online or offline.
- The delivery staff can configure the range in terms of Kms beyond which they will not receive the orders.

## 1.4 New Orders

- On the Home Page of the delivery app, new orders will be posted.
- The delivery staff can view the following details:
  - ★ Order Delivery Date & Delivery Slot
  - ★ Shop Name & Address
  - ★ Order ID
  - ★ Order Payment & Delivery Status
  - ★ A Map pinpointing the delivery staff's current location, shop's address, and buyer's address.
  - ★ Products Listing
- They can accept or reject the order at the end.
- Delivery Staff also gets push notifications whenever a new order arrives.

## 1.5 My Orders

- A listing of orders accepted by delivery staff will appear in this section.
- The delivery staff can filter out the orders based on the following criteria:
  - ★ By Order ID
  - ★ By selecting a range of dates

- ★ By Delivery Status of order
- ★ By Payment Status of the order

## 1.6 Order Detail Page

The following features are available on the order details page

- Order ID
- Order Delivery Date & Delivery Slot
- Order Amount
- Amount to Collect (in case of Cash on Delivery orders)
- Order Status & Delivery Status
- Delivery Staff's earnings from that order
- Addresses of Shop & Buyer
- Feature to call the seller or buyer directly from the app
- Feature to get directions to the shop's or buyer's address
- Product Listing
- Order Status Monitoring & Management

## 1.7 Account Management

The Delivery Staff can manage the following things through the app

- Profile Picture
- Address
- Phone Number
- Bank Details
- Login Password
- GDPR Requests
- Wallet Management

**1.8 Multiple Language Option:** The platform supports both LTR & RTL languages.

## 2. Third-Party APIs Integration

2.1 Twilio SMS Notifications Plugin

2.2 Google Map API

## 3. Growcer Niches

Growcer supports launching marketplaces of multiple niches and business models such as

1. Fruits & Vegetables
2. Milk Delivery
3. Meat Delivery
4. Farm Products
5. E-Pharmacy
6. Liquor & Wine
7. Pet Food
8. Vegan Food
9. Supplements Delivery
10. Flower Delivery
11. Online Bakery
12. Construction Material
